

Replacing a Wound Bobbin

REPLACING A WOUND BOBBIN

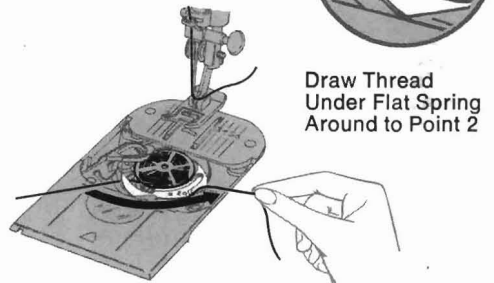

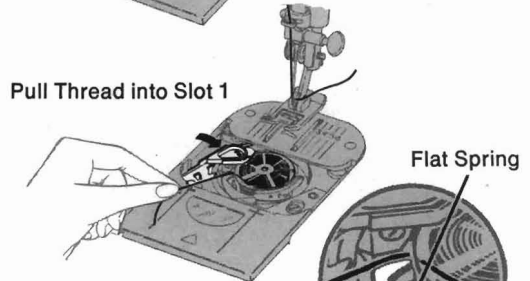

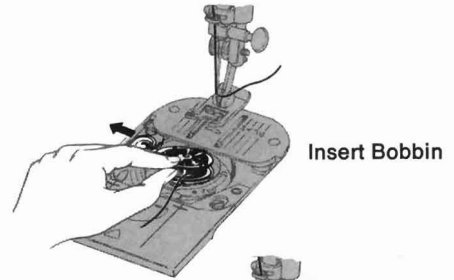

Raise take-up lever to its highest position.

1. Open slide plate; move bobbin latch to left.
2. Draw about an inch of thread from bobbin and place bobbin in case. Move bobbin latch to right (sewing position).
3. Pull thread into bobbin-case slot (point 1), draw it under flat spring and around to (or slightly past) point 2, leaving two or three inches of free thread. (Leave slide plate open.)

RAISING THE BOBBIN THREAD

Set stitch width dial at .

1. Hold needle thread lightly with left hand and turn hand wheel slowly toward you so the needle enters plate.
2. Continue turning hand wheel and holding needle thread until needle rises. Tightly hold on the needle thread and bring up bobbin thread in a loop.
3. Open the loop with your fingers, draw needle and bobbin threads under the presser foot and place them diagonally to right or left. Then close the slide plate.
